

Aaron Nola vs the Dodgers — What Each Person Can Do

dp_uc25 · uc-pps-021 · CBP · 2026-07-22 · fresh through his last start 7/16. The line is down (.358 wOBA, career worst), but the stuff and velo are fine — it's a lefty free-pass and air-ball problem, both self-correctable. Each action traces to an indicator; small H2H samples flagged in the full report.

Aaron NolaON THE MOUND Throw strike one to the lefties. 58.8% first-pitch strikes vs LHB vs 73.5% vs RHB — the 10.7% lefty walk rate starts right here. Finish with the curve & change, not the heater. Knuckle curve 42.5% whiff, changeup 26.9% vs LHB; the 4-seam misses only 13.8% and gets lifted. Keep the fastball down. Air-ball 59.7% and HR 5.1% are both career highs — every bit of the new damage is in the air.	Catcher — Realmuto / MarchanTHE SEQUENCE Two-strike target below the zone. Putaway to LHB just 18.6%; the finish pitch is never a 4-seam middle. Stubbs out — set the breaker down. Feed the changeup to lefties. 26.9% whiff, up from ~16% at UC8 — it is a real weapon now; pair it with the curve as the finish. Pitch Betts & Ohtani backward. Betts .465 wOBA / 2 HR / 23 PA; Ohtani .450 xwOBACON / 9 PA — the two bats with real danger signal.	ManagerTHE CALL Hook by matchup, not pitch count. Leash ~95–100, but the trigger is the 3rd time through the lefty top — where June and the 7/16 (3 HR) damage clustered. Have a lefty warm for the L-pocket. Five Dodgers stand left; the late-game lever is the Ohtani / Freeman / Muncy stretch. Trust the profile on the no-book bats. Tucker & Pages are 8 PA each — plan on scouting, not on a tiny H2H line.	Pitching coach / analystTHE PREP It isn't the zone — don't coach the ump. Edge rate .370 = career norm; the OOB called-strike drop is a decade glide, not a 2026 ABS cliff. It isn't the stuff — velo is flat. 4-seam 92.3, no decline; K% steady 23.8%. This is command & shape, not arm strength. Reinforce the change; watch the air ball. Changeup whiff 16%→27% vs LHB is the build-on; ground-ball rate a career-low 40.3% is the watch.

Matchup scope = 7 named hitters, not a posted lineup — confirm the card before first pitch. Full report + governance: dp_uc25_nola_vs_dodgers_report.pdf · verification dp_uc25_verification.py · public Statcast data, entity-locked pitcher==605400.
